About:

THIS IS A COURTESY POST. Purrfect Friends Cat Rescue and its volunteers have not evaluated this animal in any way and can not be held liable for the current condition or future care of the animal. Please work with the specific contact in the posting to confirm if the animal is spayed/neutered, vaccinated, tested, etc. and for a complete description of the animal's personality and behavior traits. Jiffy loves attention and affection. However he is very behavioral in that he will hide when new people are around and gets very anxious. His timidness causes him to urinate outside of his litter box. When he has 1-on 1 attention he has never had an issue. Our son has just began to crawl and has sent Jiffy into a very episodic anxiousness. He would be great with someone who has the time to give him all the attention and keep a normal routine. He truly is a sweet cat that just wants to be loved. We have attempted for a year to keep him but our young son has him very scared now that he's mobile.
